Trolls have very distinctive features. Some are dwarfs, some are giants. All have long crooked noses, only 4 fingers and toes on each limb, an most of them have long bushy tails.

The walking stick may be added as a separate piece.

Far to the North lies a long and narrow country with dark forests, moonlit lakes, deep fjords, and mighty snow-capped mountains. Thousands of years ago it was covered by a massive glacier which slowly retreated to the north. Man to the south followed the glacier Northward and settled in this new magnificent country. They were called "Nordmenn" (men of the north), and they named this new land Norway. It did not take them long, however, to realize that they were not alone !!
