

Ol' Don's Drawing Table

© 2017

Here for your carving pleasure are some ideas for carving critters in golf balls. I drew them as golf balls but by looking at just half the pattern, they could be carved in wood as a pin, refrigerator magnet, bolo tie or any number of objects. Without a great deal of modification they could be carved in a basswood egg. Let me encourage you to think beyond the appearance of the patterns and think of other applications for all or part of the drawings.

GOLF BAWLS
