## I thought I might do a little **Clownin' Around**

this time so here are the patterns for a clown bust project for you to carve.

The front and profile are your patterns. The  $\frac{3}{4}$  reference sketch can be held up to a mirror to view the cheek contour from the right side.

Rather than trying to carve the flower coming out of the inverted flower pot "hat", you may want to drill a small hole in the bottom of the pot and glue a small artificial flower or two in place.
