A Tree Ornament (or dust collector- without the hook)

Name may be carved or painted

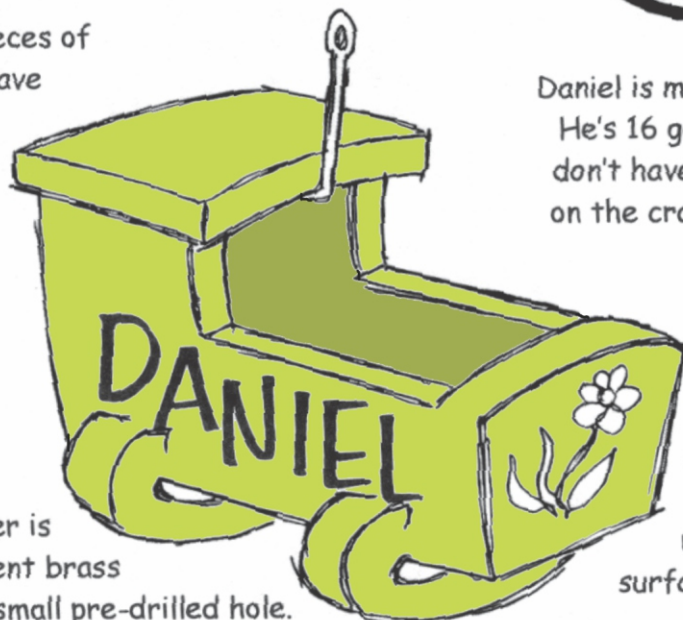

----- Grain runs lengthwise -----

I used off-cut 'n odd pieces of pine for all the ones I have carved. It's dealer's choice for materials.

Some I finished with an oak stain, some with a walnut stain; then sprayed them with a coat of satin polyurethane.

The "eye" for the hanger is a straightened and rebent brass fish hook inserted in a small pre-drilled hole.

Daniel is my eldest grandson  
He's 16 going on 41 !! You don't have to use his name on the cradle you carve :o)

I carved a little flower design in the foot end just so it wouldn't look unfinished since many of the other surfaces were carved !
